Who: Co-organizers of HCPP.cz, Ethereum Devcon & other volunteers

Hackatoshi's
FLYING
CIRCUIT

Concept

Mission of Paralelní Polis is to bring alternatives and tools for preventing authoritarian tendencies in society. Hackatoshi's Flying Circuit is an intervention of cypherpunks into both virtual and physical public space to concentrate inspiration and share knowledge and the sweat to address sick parts of the system and fix them with solutions based on principles ensuring privacy and decentralization.

Hackatoshi's Flying Circuit is a hackathon which focuses primarily on technology and promoting cypherpunk values in general public. The participants are empowered to challenge close-mindedness, stubborn conservatism and antediluvian technical solutions.

This year's competition topics are Cloud Societies & Urban Hacktivism.
